

Jonathan Rojas Troncoso

Desarrollador Fullstack

contacto@jrtdev.cl | +5693074439 | La Serena, Chile | jonathanrojas | https://www.jrtdev.cl

Skills

Languages:	JavaScript ES6+, PHP, Python, HTML5, CSS3, Bash
Frameworks:	React.js, Node.js, Express.js, Astro, Handlebars, NestJS, Discord.js
Databases:	MongoDB, MySQL
Technologies / Tools:	Microsoft Azure (App Services, Identity), Moodle, Git, GitHub, Postman, Figma, Visual Studio Code, Freshdesk, Jira
Practices:	APIs REST, Agile/Scrum, Diseño responsivo, Automatización de procesos

Experience

Preuniversitario Impulso Educa

Marzo 2025 – Junio 2025

Web Administrator / Moodle Specialist

Remoto

- Led the comprehensive assessment and configuration of the Moodle educational platform, covering all academic requirements of the pre-university.
- Developed custom modules in PHP that extended Moodle's native functionalities, optimizing the teaching staff's operational efficiency.
- Trained staff on the use of the platform, achieving full system adoption without the need for external support.
- Advised the management team on defining technological strategy and improving institutional digital processes.

Proyectos Independientes

2019 – Present

Freelance Fullstack Developer

La Serena, Chile

- Designed and developed complete web applications (frontend and backend) for multiple SMEs and educational institutions, managing the lifecycle from requirements to deployment.
- Implemented MERN and MVC architectures with Node.js/MySQL, ensuring code scalability and maintainability for various clients.
- Collaborated with clients to define interfaces and user experience using Figma for prototyping.
- Delivered solutions with reusable components and detailed technical documentation to facilitate future maintenance.

Instituciones de Educación Superior

2023 – Present

Informatics and Programming Lecturer

La Serena, Chile

- AIEP La Serena: Lecturer in the Programmer Analyst program, teaching programming and software development subjects.
- IPCHILE: Lecturer for “Hardware and Software Fundamentals”, “Information Systems Design”, and “Web Development” in Computer Engineering.
- Instituto Profesional Valle Central: Lecturer for “Information and Communication Technologies (ICTs)” in the Veterinary Technician program.
- Designed didactic material, practical guides, and assessments, providing technical guidance on students' final projects.

Instituto Profesional Valle Central

2019 – 2024

IT Manager — La Serena Campus

La Serena, Chile

- Managed the technological infrastructure for a community of over 300 users, including inventory, equipment maintenance, networks, and connectivity.
- Led the reimplementation of the campus structured cabling, achieving a significant improvement in network stability and speed.
- Developed internal tools in Node.js to automate administrative processes, reducing the team's operational workload.
- Administered the Moodle platform and cloud services in Microsoft Azure (App Services, identity management).

Projects

Server-admin

https://github.com/waflex/Server_Admin

System administration tool created for a Linux VPS, designed to assist in task execution, system management, and real-time visualization of resource usage (CPU, RAM, Disk). Includes functions for installing game servers, managing servers and services, cron management, and other utilities dedicated to the complete administration of a Linux server.

FichaVet (MERN)

<https://github.com/waflex/Ficha-Vet>

Academic management and clinical record platform for Veterinary Medicine programs. Modules for patient registration, student tracking, and report generation.

App de Inventario

<https://github.com/waflex/InventoryManagement>

Institutional asset control system with internal request workflows for employees. Currently in use in a real-world environment.

CK Decora

<https://ckdecora-landing.netlify.app/>

Corporate website focused on performance (Lighthouse>90), responsive design, and basic SEO.

BardopromedioBot

https://discord.com/oauth2/authorize?client_id=857348571246624798

Discord bot oriented towards tabletop role-playing campaigns (TTRPG), featuring dice commands, character management, and session logs.

Rubrica-Nota

<https://rubrica-nota.vercel.app/>

Academic-focused application designed to support teachers in individual or group student evaluations, allowing the import of student lists and criteria, generating automatic grade calculation based on a requirement percentage, using tools like Firebase to store data both in the cloud or locally.

Education

Instituto Profesional de Chile

2021 – 2023

Computer Engineering, Software Engineer

- Highest Distinction

Instituto Profesional de Chile

2017 – 2019

Programmer Analyst Technician, Data Analyst

- 3rd Place National Programming Tournament

AIEP

2025 – 2025

Higher Education Diploma, Education

Instituto Valle Central

2021 – 2021

Higher Education Diploma, Education
