Professional Summary

Fullstack Developer with over 2 years of experience in production environments and more than 5 years in IT operations, specialized in web applications using React, Node.js, PHP, MongoDB, and MySQL. Proven track record delivering internal platforms and tailored solutions for educational institutions and SMEs, with a focus on automation, scalability, and maintainability. Active higher education instructor with strong technical communication skills and agile teamwork. Immediately available.

Technical Skills

Frontend	React.js, HTML5, CSS3, JavaScript ES6+, Astro, Handlebars
Backend	Node.js, Express.js, PHP, Python
Databases	MongoDB, MySQL
Cloud & Platforms	Microsoft Azure (App Services, Identity), Moodle (administration and module development)
Tools	Git, GitHub, Postman, Figma, Visual Studio Code, Freshdesk
Practices	REST APIs, Agile/Scrum, Responsive Design, Process Automation

Professional Experience

- 2025 Web Administrator / Moodle Specialist, *Preuniversitario Impulso Educa*, Remote
 - Built and configured the Moodle educational platform from scratch, covering all academic requirements of the pre-university institution.
 - Developed custom PHP modules that extended native Moodle functionalities, reducing manual processes for the teaching team.
 - Trained staff on platform usage, achieving full adoption without external support.
 - Advised the management team on technology strategy and digital process improvement.
- 2019–2024 Head of IT — La Serena Campus, *Instituto Profesional Valle Central*, La Serena, Chile
 - Managed the entire technological infrastructure of the campus: inventory, equipment maintenance, networks, and connectivity for a community of over 300 users including faculty, administrative staff, and students.
 - Led the reimplementation of the campus structured cabling, significantly improving network stability and speed.
 - Developed internal tools in Node.js to automate administrative processes, reducing the operational workload of the team.
 - Administered the Moodle platform and cloud services on Microsoft Azure (App Services, identity management).
 - Optimized technical support workflows using Freshdesk, improving incident response times.
 - Trained more than 50 faculty and administrative staff members on institutional technology tools, supporting the digital transformation of the campus.

- 2019–Present Freelance Fullstack Developer, *Independent Projects*, La Serena, Chile
- Designed and developed complete web applications (frontend and backend) for SMEs and educational institutions, from requirements gathering to deployment.
 - Implemented MERN and MVC architectures with Node.js/MySQL, ensuring scalability and code maintainability.
 - Collaborated with clients on interface definition and user experience using Figma.
 - Delivered solutions with reusable components and technical documentation to facilitate future maintenance.

Teaching Experience

- 2023–Present Instructor in Computer Science and Programming, *Higher Education Institutions*, La Serena, Chile
- AIEP La Serena: Instructor in the Programmer Analyst program — programming and software development courses.
 - IPCHILE: Instructor for “Hardware and Software Fundamentals,” “Information Systems Design,” and “Web Development” in the Computer Engineering program.
 - Instituto Profesional Valle Central: Instructor for “Information and Communication Technologies (ICTs)” in the Veterinary Technician program.
 - Design of teaching materials, practical guides, and assessments; mentoring of student final projects.

Selected Projects

- Server-admin Stack: React, NestJS, Bash, Linux — System administration tool built for a Linux VPS, designed to assist with task execution, system management, and real-time visualization of resource usage (CPU, RAM, Disk). Features include game server installation, service and server administration, cron job management, and other utilities dedicated to the complete administration of a Linux server. Created in 2025 and actively maintained.
- FichaVet Stack: MongoDB, Express, React, Node.js — Academic management and clinical records platform for Veterinary Medicine programs. Modules for patient registration, student tracking, and report generation.
- Inventory App Stack: Node.js, Handlebars, MySQL — Institutional asset control system with internal request workflows for staff members. Currently in use in a real environment.
- CK Decora Stack: Astro — Corporate website focused on performance (Lighthouse >90), responsive design, and basic SEO.
- BardopromedioBot Stack: JavaScript, Discord.js — Discord bot designed for tabletop role-playing game (TTRPG) campaigns, featuring dice commands, character management, and session logs.

Academic Background

- 2021–2023 Computer Engineering, *Instituto Profesional de Chile*
- 2017–2019 Programmer Analyst Technician, *Instituto Profesional de Chile*

Certifications

- Cisco Networking Academy
- JavaScript Essentials 1 — 40 hours — October 2025
 - IT Essentials — 40 hours — March 2025

Teaching Diploma in Higher Education Teaching — 88 hours (AIEP / Instituto Profesional Valle Central)

Languages

Spanish Native

English Intermediate — Fluent reading of technical documentation; basic professional written and oral communication
